Annual Report

Trustee's Message to Participants

Dear Participant:

On behalf of the State of New Hampshire, I am pleased to provide you with your UNIQUE College Investing Plan (UNIQUE Plan) Annual Report.

Since its inception in July 1998, the UNIQUE Plan has had tremendous growth and this year is no exception. In fact, as of September 30, 2005, the UNIQUE Plan has more than 282,000 accounts and over \$3.4 billion in assets.

This Annual Report is important because it gives you, the Participant, the opportunity to review the UNIQUE Plan in depth. Contained within is information on how the various portfolios have performed, the portfolios' holdings and investment strategies. I also hope you will take the time to read the Managers' Overview, a discussion with Christopher Sharpe and Jonathan Shelon, the Portfolio Managers of the UNIQUE Plan since August 1, 2005. This is a wonderful opportunity to hear directly from the UNIQUE Plan Portfolio Managers on information specific to the portfolios over the past 12 months, the market and investing environment, and their outlook for the 12 months ahead.

Thanks to Participant feedback, we are pleased to report that over the last year several enhancements were made to the UNIQUE College Investing Plan:

- Enhanced account data on Fidelity.com. You can now view quantity, current price, current value, cost and dollar value/percent change of shares since purchase.
- Added Portfolio 2024 for beneficiaries born from 2005–2007.
- Adjusted target asset allocation of each Portfolio to include more small-cap exposure.

Saving for college is one of the biggest challenges that many of us will face as we prepare our children for their future. As Trustee of the UNIQUE Plan, I assure you that the Advisory Commission and I will continue to work with Fidelity Investments to ensure that the UNIQUE Plan is among the best available to you. We will continue to monitor issues in the mutual fund industry and, where appropriate, advocate for changes to industry practices and regulations.

Thank you for choosing the UNIQUE College Investing Plan. We look forward to serving your needs for years to come.

Sincerely,

Michael Ablowich State Treasurer

State of New Hampshire

Will A. Abbril

Performance

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

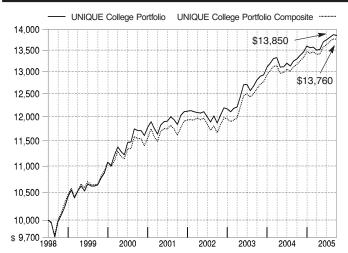

Cumulative Total Returns			
Periods ended September 30, 2005	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE College Portfolio	4.21%	18.27%	38.50%
UNIQUE College Portfolio Composite	4.54%	19.14%	37.60%
LB Int Govt/Credit Bond	1.50%	34.80%	50.40%
LB 3 Month US T-Bill	2.60%	13.08%	27.10%
Dow Jones Wilshire 5000 Composite	14.67%	-2.60%	26.36%

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on July 1, 1998. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE College Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index, the Lehman Brothers 3-Month U.S. Treasury Bill Index, and the Dow Jones Wilshire 5000 Composite Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one year and five year time periods ending September 30, 2005 and for the period from July 1, 1998 to September 30, 2005.

Average Annual Total Return	ıs		
Periods ended September 30, 2005	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE College Portfolio	4.21%	3.41%	4.59%
UNIQUE College Portfolio Composite	4.54%	3.57%	4.50%
LB Int Govt/Credit Bond	1.50%	6.16%	5.79%
LB 3 Month US T-Bill	2.60%	2.49%	3.36%
Dow Jones Wilshire 5000 Composite	14.67%	-0.53%	3.28%

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

\$10,000 Over Life of Portfolio

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE College Portfolio on July 1, 1998, when the Portfolio started. As the chart shows, by September 30, 2005, the value of the investment would have been \$13,850 — a 38.50% increase on the initial investment. For comparison, look at how the UNIQUE College Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have grown to \$13,760 — a 37.60% increase.

Understanding Performance

Performance

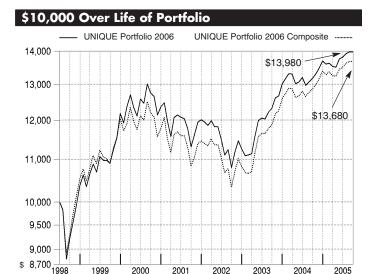

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns			
Periods ended September 30, 2005	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Portfolio 2006	6.15%	9.65%	39.80%
UNIQUE Portfolio 2006 Composite	6.29%	12.09%	36.80%
LB Int Govt/Credit Bond	1.50%	34.80%	50.40%
LB 3 Month US T-Bill	2.60%	13.08%	27.10%
MSCI EAFE	25.99%	18.06%	35.72%
Dow Jones Wilshire 5000 Composite	14.67%	-2.60%	26.36%

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on July 1, 1998. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2006 Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index, the Lehman Brothers 3-Month U.S. Treasury Bill Index, the Morgan Stanley Capital International Europe, Australasia, Far East Index, and the Dow Jones Wilshire 5000 Composite Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one year and five year periods ending September 30, 2005 and for the period from July 1, 1998 to September 30, 2005.

Average Annual Total Returns			
Periods ended September 30, 2005	Past 1 year	Past 5 years	Life of Portfolio

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2018 on January 4, 1999, when the Portfolio started. As the chart shows, by September 30, 2005, the value of the investment would have been \$12,630 — a 26.30% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2018 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$12,253 — a 22.53% increase.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Annual Report

Performance

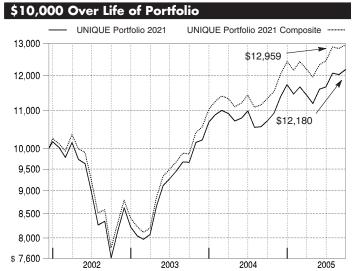

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

MSCI EAFE	9.72%
Dow Jones Wilshire 5000 Composite	4.88%

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, since the Portfolio started on December 27, 2004. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2024 Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index, the Merrill Lynch U.S. High Yield Master II Index, the Morgan Stanley Capital International Europe, Australasia, Far East Index, and the Dow Jones Wilshire 5000 Composite Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains. if any. The index returns are for the year ended September 30, 2005 and for the period from December 27, 2004 to September 30, 2005.

Average Annual Total Returns

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year. These numbers will be reported once the portfolio is a year old. In addition, the growth of a hypothetical \$10,000 investment in the portfolio will appear in the portfolio's next report.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

11 Annual Report

Performance

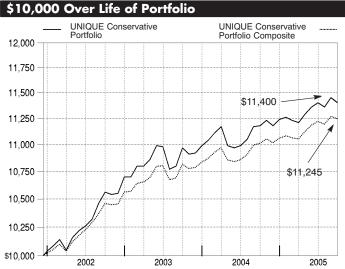

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns		
Periods ended September 30, 2005	Past 1 year	Life of Portfolio
UNIQUE Conservative Portfolio	1.97%	14.00%
UNIQUE Conservative Portfolio Composite	2.11%	12.45%
LB Int Govt/Credit Bond	1.50%	19.87%
LB 3 Month US T-Bill	2.60%	6.59%

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, since the Portfolio started on December 13, 2001. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Conservative Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index and the Lehman Brothers 3-Month U.S. Treasury Bill Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the year ended September 30, 2005 and for the period from December 13, 2001 to September 30, 2005.

Average Annual Total Returns		
Periods ended September 30, 2005	Past 1 year	Life of Portfolio
UNIQUE Conservative Portfolio	1.97%	3.51%
UNIQUE Conservative Portfolio Composite	2.11%	3.14%
LB Int Govt/Credit Bond	1.50%	4.89%
LB 3 Month US T-Bill	2.60%	1.69%

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE Conservative Portfolio on December 13, 2001, when the Portfolio started. As the chart shows, by September 30, 2005, the value of the investment would have been \$11,400 — a 14.00% increase on the initial investment. For comparison, look at how the UNIQUE Conservative Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have grown to \$11,245 — a 12.45% increase.

Understanding Performance

Performance

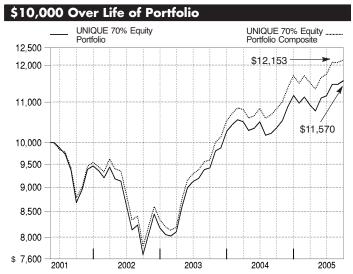

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns		
Periods ended September 30, 2005	Past 1 year	Life of Portfolio

Dow Jones Wilshire 5000 Composite	14.67%	2.83%

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

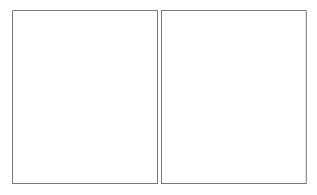

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE 100% Equity Portfolio on May 7, 2001, when the Portfolio started. As the chart shows, by September 30, 2005, the value of the investment would have been \$10,840 — a 8.40% increase on the initial investment. For comparison, look at how the UNIQUE 100% Equity Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$11,563 — a 15.63% increase.

Understanding Performance

Fund Talk: The Managers' Overview

Note to participants: The following is an interview with Christopher Sharpe (left) and Jonathan Shelon, who became Co-Portfolio Managers of the UNIQUE Plan on August 1, 2005.

Q. How did the UNIQUE Plan Portfolios perform during the past year, Chris?

C.S. For the 12-month period that ended September 30, 2005, the UNIQUE College Investing Plan's age-based Portfolios recorded absolute returns that reflected a range of performance that might be expected from a series of Portfolios with different age-appropriate, asset-allocation risk levels. On a relative basis, however, when compared with their composite benchmarks, each of the Portfolios lagged by a modest margin. While it is always our goal to outperform the benchmarks in the long term, we believe the Portfolios' relative returns during the period were within reasonable risk parameters. (For specific portfolio performance results on the age-based Portfolios and the static allocation Portfolios available in the UNIQUE Plan, please see the performance section of this report.)

Q. Turning to you, Jonathan, how would you describe the market environment during the past 12 months?

J.S. What we experienced during the past year was very strong absolute performance in the equity markets, particularly among international stocks. The Dow Jones Wilshire 5000 Composite IndexSM, the broad U.S. equity market index used in the UNIQUE Plan's composite benchmarks, rose 14.67% during the past 12 months, while the Morgan Stanley Capital InternationalSM Europe, Australasia, Far East (MSCI® EAFE®) Index, a broad benchmark for the international equity markets, gained 25.99%. If you look at the Plan's age-based Portfolios — from the 2024 Portfolio right on down to the College Portfolio — all of them performed in line with their equity allocations, meaning that the greater the equity allocation of each Portfolio, the greater its absolute return. So it was a period in which returns were very much in line with the market and very much in line with age-appropriate risk taking. From a relative point of view, however, the Portfolios performed slightly behind their respective composite benchmarks. I believe the lagging returns were largely the result of weakness in some of our underlying domestic equity funds, especially early in the period. Later in the period, however, the performance gap narrowed appreciably, and we started to see a more sustained upward trend in the performance of our underlying U.S. equity funds, which was based to some degree on the market tending to favor higher-quality, largercapitalization stocks and to de-emphasize more-speculative, smaller-cap

names. This occurred even as investors were demonstrating their onagain, off-again concerns about rising energy prices and short-term interest rate hikes by the Federal Reserve Board. During the period, three of the Plan's underlying domestic equity funds — Fidelity® Disciplined Equity Fund, Fidelity Growth Company Fund and Fidelity OTC Portfolio — handily beat the Dow Jones Wilshire index, while the remaining five lagged. Both of the underlying funds on the foreign equity side — Fidelity Diversified International Fund and Fidelity Overseas Fund — performed roughly in line with the MSCI EAFE index's strong return during the period.

Q. Chris, what can you tell us about how the other asset classes in the Portfolios fared?

C.S. Bonds were a bright spot during the period. Absolute performance for the overall category was reasonably strong, and, on a relative basis, all of the underlying funds in the bond group outperformed their respective benchmarks, largely as a result of superior security selection. The high-yield bond class performed the best, with the two underlying funds — Fidelity Capital & Income Fund and Fidelity High Income Fund — both delivering returns that exceeded the 6.70% gain of the Merrill Lynch® U.S. High Yield Master II Index. Investment-grade bonds also did well, mainly by virtue of strong security selection in U.S. government agencies and asset-backed securities. Each of the three underlying funds in that category — Fidelity Investment Grade Bond Fund, Fidelity Intermediate Bond Fund and Fidelity Government Income Fund — outpaced the 1.50% return of the Lehman Brothers® Intermediate Government/Credit Bond Index.

Q. Would you elaborate a bit further on the Plan's age-based allocation strategy?

C.S. Sure. The basic premise of the UNIQUE Plan's age-based Portfolios is to try to ensure that investors have the best probability of reaching the education savings goals for their intended beneficiaries. We do this by taking certain "knowns" — such as time horizon and the historical performance of certain asset classes — and then structuring each of the agebased Portfolios in such a way that its asset allocation becomes more conservatively positioned as the beneficiaries' matriculation date draws nearer. In other words, we build Portfolios that expose investors to multiple asset classes, allocated according to the length of time until matriculation, so that they avoid the dual risks of excessive caution when the beneficiary is young and excessive risk-taking when the beneficiary is approaching enrollment. While the relative, short-term performance of the Portfolios is important, because that is how Fidelity tries to add value to this product, what is more critical for Plan investors trying to achieve college savings goals is how well our age-based asset allocation model works over time.

Q. Back to you, Jonathan. What's your outlook for the months ahead?

J.S. The direction and strength of the economy are always tough to predict, and managing on the basis of short-term views really is not how the UNIQUE Plan's Portfolios are run. The team's asset allocation strategy is constructed for the long term, with a focus on how different asset classes tend to interact over time. We believe it's important to maintain an age-appropriate mix of investments in multiple asset classes, and we leave it to the managers and research analysts of the Portfolios' underlying

Fund Talk: The Managers' Overview - continued

mutual funds to select the individual securities that they think best meet their funds' investment objectives. As individual funds meet their goals, our asset allocation strategy helps ensure that investors' college savings goals have a strong probability of being met. The table below illustrates the target mix we'd like to achieve for each Portfolio on March 31, 2006.

Projected Target Mix											
	College	2006	2009	2012	2015	2018	2021	2024	Conservative	70% Equity	100% Equity

Portfolio Facts

Goal: All of the age-based Portfolios seek capital appreciation with reasonable safety of principal, consistent with the ages of the beneficiaries for whom they are designed. There are three static allocation Portfolios. The investment objective of the Conservative Portfolio is preservation of capital by allocating its assets among bond and money market funds. Income is a secondary objective. The investment objective of 70% Equity Portfolio is to maximize total return over the long term by allocating assets among stock and bond mutual funds. The investment objective of 100% Equity Portfolio is growth of capital over the long term.

Start dates: July 1, 1998; except 2024, which started on December 27, 2004; 2018, which started on January 4, 1999; 70% Equity Portfolio, which started on May 10, 2001: 100% Equity Portfolio, which started on May 7, 2001; and 2021 Portfolio and Conservative Portfolio, both of which started on December 13, 2001

Size: as of September 30, 2005, more than \$151 million (College); \$349 million (2006); \$489 million (2009); \$517 million (2012); \$561 million (2015); \$542 million (2018); \$273 million (2021); \$12 million (2024); \$64 million (Conservative); \$163 million (70% Equity); \$285 million (100% Equity)

Co-Managers: Christopher Sharpe, since August 2005; co-portfolio manager, VIP: Freedom Funds, since April 2005; Fidelity Arizona College Savings Plan, since June 2005; Fidelity Delaware, Massachusetts College Savings Plans, since August 2005; joined Fidelity in 2002; Jonathan Shelon, since August 2005; co-portfolio manager, Fidelity Freedom Funds, since March 2005; Fidelity Arizona College Savings Plan, since June 2005; Fidelity Delaware, Massachusetts College Savings Plans, since August 2005; Fidelity Advisor Freedom Funds, since 2003; joined Fidelity in 2001

Christopher Sharpe on managing in a choppy market:

"Continuous monitoring and periodic rebalancing are vital parts of our asset allocation model and can provide significant benefits for our shareholders. It's very difficult to rebalance a portfolio in volatile markets because you don't want to get whipsawed. By that, I mean you don't want to rebalance one way one day, then have to rebalance another way the next because of certain events or gyrations in the market. So we rely on the consistent cash flows into the UNIQUE Plan to help us more efficiently manage the Portfolios. That is, as assets flow into or out of the Plan, we can identify areas that are underweighted or overweighted in our allocation model and invest the incoming assets accordingly, thereby rebalancing the Portfolios without necessarily having to make trades during times of volatility.

"Our approach is to let the long-term focus of our asset allocation model drive the investment engine, while the managers of the underlying mutual funds use their best thinking to pick the securities that add value over and above what the markets are achieving. Going forward, it's important that Jonathan and I maintain the integrity of this investment engine, keep a long-term focus and not overreact to short-term market events."

Changes to the UNIQUE Plan

Effective August 1, 2005, the following changes were made to the UNIQUE Plan's Portfolios:

Fidelity Small Cap Independence Fund was added to the underlying equity fund lineup to provide further small-cap exposure, while Fidelity Fund, whose large-cap investment focus is duplicated by other underlying funds, is gradually being removed over time.

Annualized
For the period May 7, 2001 (commencement of operations) to September 30, 2001.
Total returns for periods of less than one year are not annualized.
Net investment income (loss) has been calculated based on average units outstanding during the period.

Notes to Financial Statements

For the year ended September 30, 2005

1. Significant Accounting Policies

The New Hampshire Higher Education Savings Plan Trust (the "Trust") was formed to establish and maintain a qualified tuition program under section 529 of the Internal Revenue Code of 1986, as amended. The Treasurer of the State of New Hampshire (State of New Hampshire) is the Trustee of the Trust. The Trust includes thirty-two investment Portfolios (the "Portfolios") as of September 30, 2005, eleven of which are offered under the name of the UNIQUE College Investing Plan (the "Plan"). These financial statements report on the Portfolios of the Plan, nine of which invest in equity, fixed-income, and/or money market funds, one of which invests in fixed-income and money market funds and one of which invests entirely in equity funds. The equity, fixed-income, and money market funds, collectively referred to as the Underlying Funds, are managed by Fidelity Management & Research Company (FMR). The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America which require management to make certain estimates and assumptions at the date of the financial statements.

The UNIQUE Portfolio 2003 was liquidated and merged into the UNIQUE College Portfolio on December 31, 2004. The UNIQUE Portfolio 2024 commenced operations on December 27, 2004.

The following summarizes the significant accounting policies of the Portfolios:

Security Valuation. Net asset per value per unit is calculated as of the close of business of the New York Stock Exchange, normally 4:00 p.m. Eastern time. Investments in the Underlying Funds are valued at the closing net asset value per share each business day.

Investment Transactions and Income. Security transactions, normally shares of the Underlying Funds, are accounted for as of trade date. Gains and losses on securities sold are determined on the basis of average cost. Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date.

Expenses. Expenses are recorded on the accrual basis. Most expenses of the Trust can be directly attributed to a Portfolio. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with the Underlying Funds.

Units. The beneficial interest of each participant in the net assets of the Portfolios are represented by units. Contributions to and redemptions from the Portfolios are subject to terms and limitations defined in the Participation Agreement between the participant and the Trust. Contributions and redemptions are recorded upon receipt of participant's instructions in good order, based on the next determined net asset value per unit (unit value). Unit values for each Portfolio are determined daily. There are no distributions of net investment gains or net investment income to the Portfolios' participants or beneficiaries.

2. Fees

The State of New Hampshire has entered into a Management and Administrative Services agreement with FMR Corp. (the parent company of the group of companies commonly known as Fidelity Investments), Strategic Advisers, Inc. (Strategic) and Fidelity Brokerage Services, LLC (together Fidelity) to provide administrative, record keeping, marketing, and investment management services to the Trust.

According to this agreement and a related investment advisory agreement with Strategic, an investment adviser registered under the Investment Advisers Act of 1940, Fidelity receives a fee computed daily at an annual rate of .15% of net assets of the Portfolios. This fee is paid from a fee imposed by the State of New Hampshire equal to .30% annually of each Portfolio's net assets. The remaining .15% is retained by the State of New Hampshire.

Prior to August 1, 2005, each UNIQUE College Investing Plan account was charged a \$30 annual fee, which is waived under certain circumstances. As of August 1, 2005, the annual fee was reduced to \$20. Any annual fees imposed by the State of New Hampshire are in turn paid to Fidelity. Annual fees charged during the year are included in Cost of units redeemed and fees on the Statements of Changes in Net Assets. For the year ended September 30, 2005, total annual fees charged for the Portfolios were \$1,976,931.

3. Other

The Portfolios' organizational documents provide limited indemnification against liabilities. In the normal course of business, the Portfolios may also enter into contracts that provide general indemnifications. The Portfolios' maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Portfolios. The risk of material loss from such claims is considered remote.

The Portfolios do not invest in the Underlying Funds for the purpose of exercising management or control; however, investments by the Portfolios within their principal investment strategies may represent a significant portion of the Underlying Fund's net assets. At the end of the period, no Portfolio held a significant portion of the outstanding shares of any Underlying Fund.

Report of Independent Auditors

To the Fiscal Committee of the General Court of the State of New Hampshire, the Trustee of the New Hampshire Higher Education Savings Plan Trust and the Participants of The UNIQUE College Investing Plan:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of portfolio investments as of September 30, 2005, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the New Hampshire Higher Education Savings Plan Trust: UNIQUE College Portfolio, UNIQUE Portfolio 2009, UNIQUE Portfolio 2012, UNIQUE Portfolio 2015, UNIQUE Portfolio 2018, UNIQUE Portfolio 2021, UNIQUE Portfolio 2021, UNIQUE Portfolio 2024, UNIQUE Conservative Portfolio, UNIQUE 70% Equity Portfolio, and UNIQUE 100% Equity Portfolio (collectively the "Portfolios") at September 30, 2005, and the results of each of their operations, the changes in each of their net assets and each of their financial highlights for the periods indicated, in conformity with accounting principles generally accepted in the United States of America. The financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolios' management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement presentation. We believe that our audits, which include confirmation of securities at September 30, 2005, by correspondence with the transfer agent, provide a reasonable basis for our opinion.
