## Trustee's Message to Participants

#### Dear Participant:

On behalf of the State of New Hampshire and the College Tuition Savings Plan Advisory Commission it is my pleasure to present you with your UNIQUE College Investing Plan Annual Report. Your Annual Report reviews the financial results of the Plan for the period October 1, 2008 to September 30, 2009, including the performance of the Plan's investment Portfolios along with expense, holdings, and asset allocation information. Also included is a *Manager's Overview*, a discussion with the Plan's Portfolio Managers Andrew Dierdorf and Christopher Sharpe, which provides you with specific information on the Portfolios over the last year, the market and investing environment, and an outlook for the months ahead.

The unpredictable nature of the financial markets was amplified by the world-wide turmoil that we all experienced over the past year. The resulting uncertainties underscore the importance of having a sound and disciplined financial plan. That holds true regardless of your ultimate goal — whether it be saving for your first house, preparing for retirement, or looking to send your children to college.

Saving for college is a common and important goal for many American families. And with less than 18 years before that first college tuition bill comes due, the challenge is clear. The cost for a public four-year in-state college increased by 6.4% from 2008 to 2009, 1 a long-term trend that shows little signs of changing. So following some of the basic tenets of investing — like starting early and saving consistently — can help make a difference in your ability to meet your goals. Leveraging the benefits of the UNIQUE College Investing Plan can help even more.

As of September 30, 2009 there were over 364,000 accounts representing \$5.4 billion in assets. In the face of difficult financial markets, clients continue to recognize and take advantage of the benefits of the UNIQUE College Investing Plan.

With the UNIQUE College Investing Plan, the College Tuition Savings Plan Advisory Commission and Fidelity Investments, the Plan's program manager, are committed to working together to help American families reach their college savings goals.

On behalf of the College Tuition Savings Plan Advisory Commission, thank you for choosing the UNIQUE College Investing Plan.

Sincerely,

Catherine A. Provencher

Catherine Lovenche

State Treasurer

State of New Hampshire

#### **UNIQUE College Portfolio**

## **Performance: The Bottom Line**

#### **Performance**

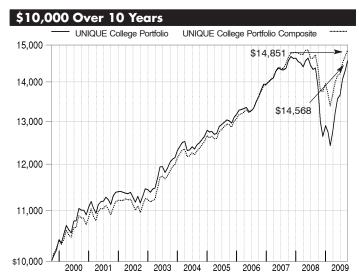

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns			
Periods ended September 30, 2009	Past 1 year	Past 5 years	Past 10 years
UNIQUE College Portfolio	4.94%	16.63%	45.68%
UNIQUE College Portfolio Composite	3.49%	20.13%	48.51%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	25.72%	77.40%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	16.92%	36.36%
Dow Jones U.S. Total Stock Market Index	-6.25%	9.31%	9.07%

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year, five years, and past ten years. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE College Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Barclays Capital U.S. Intermediate Government/Credit Bond Index, the Barclays Capital U.S. 3 Month Treasury Bill Index, and the Dow Jones U.S. Total Stock Market Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one-year, five-year and ten-year time periods ending September 30, 2009.

Average Annual Total Returns	S		
Periods ended September 30, 2009	Past 1 year	Past 5 years	Past 10 years
UNIQUE College Portfolio	4.94%	3.12%	3.83%
UNIQUE College Portfolio Composite	3.49%	3.74%	4.03%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	4.68%	5.90%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	3.18%	3.15%
Dow Jones U.S. Total Stock Market Index	-6.25%	1.80%	0.87%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Past 10 Years:** Let's say hypothetically that \$10,000 was invested in UNIQUE College Portfolio on September 30, 1999 (past ten year period). As the chart shows, by September 30, 2009, the value of the investment would have been \$14,568 — a 45.68% increase on the initial investment. For comparison, look at how the UNIQUE College Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$14.851 — a 48.51% increase.

5

**Past 10 Years:** Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2018 on September 30, 1999 (past ten year period). As the chart shows, by September 30, 2009 the value of the investment would have been \$12,292 — a 22.92% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2018 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$12,692 — a 26.92% increase.

## **Understanding Performance**

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

#### **Performance**

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns			
Periods ended September 30, 2009	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Portfolio 2021	0.16%	16.04%	24.40%
UNIQUE Portfolio 2021 Composite	-0.19%	19.45%	35.38%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	25.72%	48.47%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	16.92%	21.46%
ML U.S. High Yield Master II Constrained Index	22.73%	34.41%	81.65%
MSCI EAFE Index	3.37%	35.29%	69.44%
Dow Jones U.S. Total Stock Market Index	-6.25%	9.31%	19.66%

**Cumulative total returns** show the portfolio's performance in percentage terms over a set period of time — in this case, one year, five years or since the Portfolio started on December 13, 2001. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2021 Composite Index, an approximate weighted combination of the following unmanaged indices: the Barclays Capital U.S. Intermediate Government/Credit Bond Index, the Barclays Capital U.S. 3 Month Treasury Bill Index, the Merrill Lynch U.S. High Yield Master II Constrained Index, the MSCI EAFE Index (Europe, Australasia, Far East), and the Dow Jones U.S. Total Stock Market Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one-year and five-year periods ended September 30, 2009 and for the period from December 13, 2001 to September 30, 2009.

Average Annual Total Return	15		
Periods ended September 30, 2009	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Portfolio 2021	0.16%	3.02%	2.84%
UNIQUE Portfolio 2021 Composite	-0.19%	3.62%	3.96%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	4.68%	5.20%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	3.18%	2.52%
ML U.S. High Yield Master II Constrained Index	22.73%	6.09%	7.95%
MSCI EAFE Index	3.37%	6.23%	6.99%
Dow Jones U.S. Total Stock Market Index	-6.25%	1.80%	2.33%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2021 on December 13, 2001, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$12,440 — a 24.40% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2021 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$13,538 — a 35.38% increase.

#### **Performance**

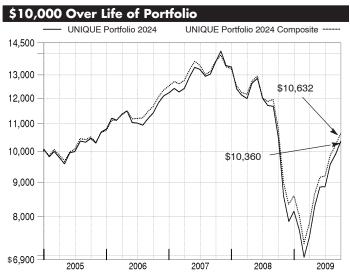

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Portfolio 2024	-0.96%	3.60%
UNIQUE Portfolio 2024 Composite	-1.57%	6.32%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	25.38%
ML U.S. High Yield Master II Constrained Index	22.73%	28.79%
MSCI EAFE Index	3.37%	17.82%
Dow Jones U.S. Total Stock Market Index	-6.25%	-0.03%

**Cumulative total returns** show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on December 27, 2004. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2024 Composite Index, an approximate weighted combination of the following unmanaged indices: the Barclays Capital U.S. Intermediate Government/Credit Bond Index, the Merrill Lynch U.S. High Yield Master II Constrained Index, the MSCI EAFE Index (Europe, Australasia, Far East), and the Dow Jones U.S. Total Stock Market Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one-year period ended September 30, 2009 and for the period from December 27, 2004 to September 30, 2009.

Average Annual Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Portfolio 2024	-0.96%	0.75%
UNIQUE Portfolio 2024 Composite	-1.57%	1.30%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	4.87%
ML U.S. High Yield Master II Constrained		
Index	22.73%	5.46%
MSCI EAFE Index	3.37%	3.50%
Dow Jones U.S. Total Stock Market Index	-6.25%	-0.01%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2024 on December 27, 2004, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$10,360 — a 3.60% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2024 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$10,632 — a 6.32% increase.

## **Understanding Performance**

#### **Performance**

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Portfolio 2027	-1.27%	-22.50%
UNIQUE Portfolio 2027 Composite	-1.75%	-20.30%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	11.34%
ML U.S. High Yield Master II Constrained Index	22.73%	10.29%
MSCI EAFE Index	3.37%	-26.42%
Dow Jones U.S. Total Stock Market Index	-6.25%	-23.54%

**Cumulative total returns** show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on December 14, 2007. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2027 Composite Index, an approximate weighted combination of the following unmanaged indices: the Barclays Capital U.S. Intermediate Government/Credit Bond Index, the Merrill Lynch U.S. High Yield Master II Constrained Index, the MSCI EAFE Index (Europe, Australasia, Far East), and the Dow Jones U.S. Total Stock Market Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one-year period ended September 30, 2009 and for the period from December 14, 2007 to September 30, 2009.

Average Annual Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Portfolio 2027	-1.27%	-13.22%
UNIQUE Portfolio 2027 Composite	-1.75%	-11.86%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	6.16%
ML U.S. High Yield Master II Constrained	00.700/	F //00/
Index	22.73%	5.60%
MSCI EAFE Index	3.37%	-15.69%
Dow Jones U.S. Total Stock Market Index	-6.25%	-13.88%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2027 on December 14, 2007, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$7,750 — a 22.50% decrease on the initial investment. For comparison, look at how the UNIQUE Portfolio 2027 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$7,970 — a 20.30% decrease.

## **Understanding Performance**

#### **UNIQUE Conservative Portfolio**

## **Performance: The Bottom Line**

#### **Performance**

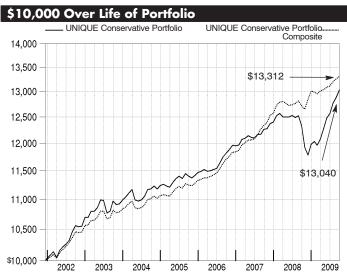

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns			
Periods ended September 30, 2009	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Conservative Portfolio	5.76%	16.64%	30.40%
UNIQUE Conservative Portfolio Composite	4.69%	20.88%	33.12%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	25.72%	48.47%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	16.92%	21.46%

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year, five years or since the Portfolio started on December 13, 2001. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Conservative Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Barclays Capital U.S. Intermediate Government/Credit Bond Index and the Barclays Capital U.S. 3 Month Treasury Bill Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one-year and five-year periods ended September 30, 2009 and for the period from December 13, 2001 to September 30, 2009.

Average Annual Total Return	15		
Periods ended September 30, 2009	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Conservative Portfolio	5.76%	3.13%	3.46%
UNIQUE Conservative Portfolio Composite	4.69%	3.87%	3.73%
Barclays Capital U.S. Intermediate Government/Credit Bond Index	10.01%	4.68%	5.20%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	3.18%	2.52%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Conservative Portfolio on December 13, 2001, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$13,040 — a 30.40% increase on the initial investment. For comparison, look at how the UNIQUE Conservative Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$13,312 — a 33.12% increase.

Barclays Capital U.S. 5–10 Yr Treasury Bond	7.400/	0.100/
Index	7.48%	8.13%
MSCI EAFE Index	3.37%	-5.02%
Dow Jones U.S. Total Stock Market Index	-6.25%	-6.14%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Index Portfolio 2015 on November 6, 2006, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$10,090 — a 0.90% increase on the initial investment. For comparison, look at how the UNIQUE Index Portfolio 2015 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$10,177 — a 1.77% increase.

## **Understanding Performance**

#### **Performance**

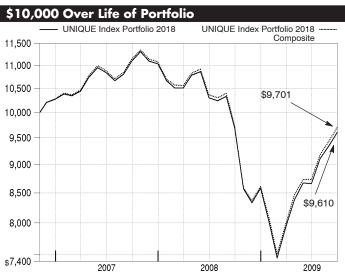

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Index Portfolio 2018	-0.83%	-3.90%
UNIQUE Index Portfolio 2018 Composite	-0.16%	-2.99%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	8.52%
Barclays Capital U.S. 5–10 Yr Treasury Bond		0 = 4=04
Index	7.48%	25.47%
MSCI EAFE Index	3.37%	-13.87%
Dow Jones U.S. Total Stock Market Index	-6.25%	-16.80%

**Cumulative total returns** show the Portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on November 6, 2006. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1.050. You can compare the Portfolio's returns to the performance of the UNIQUE Index Portfolio 2018 Composite Index, an approximate weighted combination of the following unmanaged indices: the Barclays Capital U.S. 3 Month Treasury Bill Index, the Barclays Capital U.S. 5-10 Year Treasury Bond Index, the MSCI EAFE Index (Europe, Australasia, Far East), and the Dow Jones U.S. Total Stock Market Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one-year period ended September 30, 2009 and for the period from November 6, 2006 to September 30, 2009.

Average Annual Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Index Portfolio 2018	-0.83%	-1.36%
UNIQUE Index Portfolio 2018 Composite	-0.16%	-1.04%
Barclays Capital U.S. 3 Month Treasury Bill Index	0.46%	2.86%
Barclays Capital U.S. 5–10 Yr Treasury Bond Index	7 400/	8.13%
111007	7.48%	
MSCI EAFE Index	3.37%	-5.02%
Dow Jones U.S. Total Stock Market Index	-6.25%	-6.14%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Index Portfolio 2018 on November 6, 2006, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$9,610 — a 3.90% decrease on the initial investment. For comparison, look at how the UNIQUE Index Portfolio 2018 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$9,701 — a 2.99% decrease.

## **Understanding Performance**

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

#### **Performance**

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns

## **Performance: The Bottom Line**

#### **Performance**

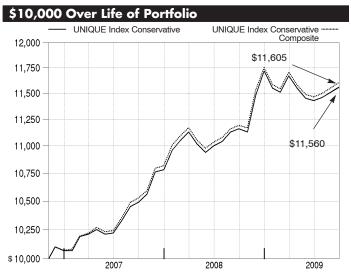

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Spartan 500 Index Portfolio	<b>-</b> 7.22%	-19.10%
Standard & Poors 500 <sup>SM</sup> Index (S&P 500® Index)	-6.91%	-18.24%

**Cumulative total returns** show the Portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on November 6, 2006. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the Standard & Poor's 500<sup>SM</sup> Index (S&P 500<sup>®</sup> Index). The benchmark includes reinvested dividends and capital gains, if any. The index returns are for the one-year period ended September 30, 2009 and for the period from November 6, 2006 to September 30, 2009.

Average Annual Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Spartan 500 Index Portfolio	-7.22%	-7.05%
Standard & Poors 500 Index (S&P 500 Index)	-6.91%	-6.71%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Spartan 500 Index Portfolio on November 6, 2006, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$8,090 — a 19.10% decrease on the initial investment. For comparison, look at how the S&P 500 Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$8,176 — an 18.24% decrease.

## **Understanding Performance**

#### **UNIQUE Total Market Index Portfolio**

## **Performance: The Bottom Line**

#### **Performance**

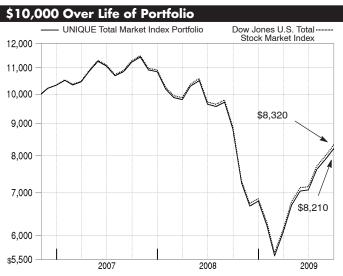

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns										
Periods ended September 30, 2009	Past 1 year	Life of Portfolio								
UNIQUE Total Market Index Portfolio	-6.81%	-17.90%								
Dow Jones U.S. Total Stock Market Index	-6.25%	-16.80%								

**Cumulative total returns** show the Portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on November 6, 2006. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the Dow Jones U.S. Total Stock Market Index. The benchmark includes reinvested dividends and capital gains, if any. The index returns are for the one-year period ended September 30, 2009 and for the period from November 6, 2006 to September 30, 2009.

Average Annual Total Returns		
Periods ended September 30, 2009	Past 1 year	Life of Portfolio
UNIQUE Total Market Index Portfolio	-6.81%	-6.57%
Dow Jones U.S. Total Stock Market Index	-6.25%	-6.14%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Total Market Index Portfolio on November 6, 2006, when the Portfolio started. As the chart shows, by September 30, 2009, the value of the investment would have been \$8,210 — a 17.90% decrease on the initial investment. For comparison, look at how the Dow Jones U.S. Total Stock Market Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$8,320 — a 16.80% decrease.

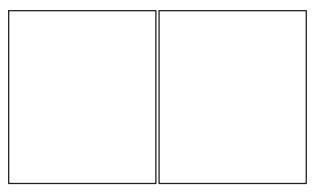

31

## **Understanding Performance**

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

## Fund Talk: The Managers' Overview

Christopher Sharpe (left) and Andrew Dierdorf, Co-Portfolio Managers of the UNIQUE College Investing Plan<sup>SM</sup>

## **Q.** Andrew, how did the Portfolios perform during the 12 months ending September 30, 2009?

**A.D.** This past year saw not only one of the worst declines in stock market history but also one of the best rallies. It was truly a tale of two halves. The markets toppled under a multitude of stresses in the final months of 2008, and the first months of 2009 brought continued bad news for the investment arena. During this time, investors fled from risk, preferring the perceived safety of asset classes secured by government backing. However, buoved by a sea change in investor sentiment, a rally beginning in mid-March helped the UNIQUE College Investing Plan Portfolios gain back much of their losses. Ultimately, all of the actively managed Portfolios — except Portfolio 2027 and Portfolio 2024 — posted positive returns. On an absolute basis, the shorter-dated Portfolios benefited from their greater allocations to investment-grade debt and short-term investments, whereas the Portfolios with the longest times until maturity — that is, those structured to have the greatest allocations to equities, which were especially hard-hit during the downturn suffered. On a relative basis versus their individual Composite indexes, all of the actively managed and static allocation Portfolios beat their Composite benchmarks. All of the index age-based and index static allocation Portfolios performed roughly in line with their respective Composite indexes. (For specific portfolio performance results, please refer to the performance section of this report.)

## Q. Chris, can you elaborate on what the investment environment was like during the past year?

**C.S.** Volatility certainly was the dominant factor to contend with during the period. The lingering effects of the subprime credit crisis continued to loom large in the last three months of 2008. Fueled by the lack of trust in the global capital markets, credit tightened to unprecedented levels. These factors, combined with the failures of several notable investment banks — led by the demise of Lehman Brothers — as well as the government rescues of insurance giant American International Group (AIG) and mortgage underwriters Fannie Mae and Freddie Mac, caused the markets to tumble. Dismal news continued into the early months of 2009, but March signaled an inflection point. Credit conditions improved somewhat, with companies finding it easier and less expensive to tap into the debt markets for capital. In addition, the unprecedented government stimulus being pumped into the economy and a rebound in corporate earnings reported in the first quarter of 2009 seemed to encourage investors to emerge from behind the perceived safety of U.S. Treasury bonds and cash and to re-enter the equity and high-yield markets. This renewed appetite for risk led to a stock market rally beginning in early March that continued through the end of the period. High-yield bonds also benefited from investors' increased demand for riskier assets, with the sector outpacing investment-grade debt.

#### Q. Andrew, how did this environment affect the Portfolios' results?

**A.D.** While the one-year period was an uphill battle for all asset classes, equities faced the steepest challenge, as they generally had been decimated in the first half of the period. U.S. equities — as measured by the Dow Jones U.S. Total Stock Market Index<sup>SM</sup> — fell 6.25% for the year. However, the latter six months of the period proved especially rewarding, with the Dow Jones index soaring 35.87%. As investors' appetite for risk returned, the situation for foreign equities proved better than in the U.S., as exhibited by the MSCI® EAFE® Index (Europe, Australasia, Far East), which rose a solid 3.37% for the full year. Again, the six months ending September 30, 2009, were very important — the MSCI rocketed 50.03% during that time — more than balancing out the losses of the first six months of the period. On a relative basis, eight of the Portfolios' 10 underlying equity funds beat their respective benchmark indexes. In absolute terms, the best domestic equity performance came from Fidelity® OTC Portfolio. Our international equity class did not fare as well. In an environment where higher-risk stocks won out, performance for these international funds was tempered, as they generally held higher-quality securities.

#### Q. Chris, what about the Portfolios' fixed-income investments?

**C.S.** In the first six months, investment-grade debt and money market/ short-term instruments won out, but the second half of the period proved to be a mirror image of the first, with higher-yielding bonds taking the lead. Investment-grade bonds turned in very solid results for the year, with the bellwether Barclays Capital U.S. Intermediate Government/ Credit Bond Index gaining 10.01%. Our underlying investment-grade bond sleeve edged out the Barclays Capital index, the major driver being Fidelity Total Bond Fund. Holding back results, however, was Fidelity Strategic Real Return Fund, which maintains allocations to real estate investment trusts and commodities, both of which severely underperformed the broader market for most of the period. One of the primary reasons for including Strategic Real Return is to provide protection against inflation. We believe this is especially important for 529 Plan participants, who have experienced college tuition inflation exceeding core measures of economic inflation for a number of years. In a deflationary environment, like the one in 2008 and into 2009, Strategic Real Return did poorly. But, given the direction of government monetary policy and the general trend in college tuition inflation, we have high conviction that the fund should remain an important part of the Portfolios, particularly as participants' college years approach and the Portfolios' equity allocation is reduced. Looking at the money market/short-term asset class, the underlying funds solidly outperformed the Barclays Capital U.S. 3 Month Treasury Bill Index, which rose a mere 0.46%. The biggest overall boost in the fixed-income sleeve came from the Funds' high-yield bond sleeve, even though it fell short of the 22.73% rise of the Merrill Lynch® U.S. High Yield Master II Constrained Index.

## Q. Andrew, after a very rough 2008 and early 2009, the tide seems to have turned. What should participants keep in mind as they look to the rest of the year?

**A.D.** While we may not be sure which direction the market is heading in the short term, we do expect that volatility is likely to persist. The past

year has been challenging for both us and our participants, as the markets experienced one of the worst downturns in history and then bounced back to see some of the greatest gains in recent memory. There still are many stresses plaguing the investment environment: sagging employment rates, the threat of inflation, flat-lining housing prices and a cautious credit market. Government intervention, including interest rate easing and federally sponsored bailout packages, has provided some impetus for investors to regain confidence, but the outcome of these actions remains to be seen. As such, we think it's more important than ever for participants with long-term savings goals to stay the course.

#### **Portfolio Facts**

Goals: All of the age-based Portfolios seek capital appreciation with reasonable safety of principal, consistent with the ages of the beneficiaries for whom they are designed. There are six static allocation Portfolios. The investment objective of Conservative and Index Conservative Portfolios is preservation of capital by allocating their assets among bond and money market funds. Income is a secondary objective. The investment objective of the 70% Equity and Index 70% Equity Portfolios is to maximize total return over the long term by allocating assets among stock and bond mutual funds. The investment objective of 100% Equity and Index 100% Equity Portfolios is growth of capital over the long term. Each of the individual fund Portfolios has the same investment objective as the underlying mutual fund in which each invests.

**Start dates:** July 1, 1998; except 2018 Portfolio, which started on January 4, 1999; 70% Equity Portfolio, which started on May 10, 2001; 100% Equity Portfolio, which started on May 7, 2001; 2021 Portfolio and Conservative Portfolio, both of which started on December 13, 2001; 2024 Portfolio, which started on December 27, 2004; Index Fund Portfolios (age-based, static and individual) and Money Market Portfolio, which started on November 6, 2006; and Index 2027 Portfolio and 2027 Portfolio, which started on December 14, 2007

**Co-Managers:** Christopher Sharpe, since 2005; co-manager, Fidelity Four-in-One Index, since June 2009 and 2005–2007; Fidelity Freedom Funds, since 2007; college investment plans for Arizona, Delaware and Massachusetts, since 2005, and for California, since 2006; VIP Freedom Funds, since 2005; joined Fidelity in 2002; Andrew Dierdorf, since 2007; co-manager, college investment plans for Arizona, California, Delaware and Massachusetts, since 2007; joined Fidelity in 2004

## Christopher Sharpe talks about the importance of diversification:

"The only thing we were sure of as we moved through 2008 and into 2009 was that there would be continued volatility in the marketplace. As the period progressed, we saw unprecedented strains on the investment marketplace, ranging from the collapse of several much-storied investment banks, to acquisitions and consolidation in various industries, to a flight to quality that led investors to move assets away from equities and into U.S. Treasuries and cash, to a reversal back toward riskier asset classes in the final six months of the period. While it may seem like a good idea to be invested in cash during turbulent times, over the long term that positioning is not likely to benefit investors.

"Even with the Federal Reserve Board and U.S. Treasury pumping massive amounts of stimulus into the financial system, it's not yet clear what long-term effects that will have on the economy or the markets. However, many investors are confident that inflation will be a serious issue to contend with as we move beyond 2009. Inflation would not only affect investors, but also would hurt colleges and universities. Many college endowments were decimated in the downturn, which may mean that students have to bear greater proportions of the costs of their college education. If participants focus solely on avoiding the ups and downs of the current market environment by investing in 'safe' instruments, they risk passing up on the potential equity and bond market recovery over the long term, thereby missing out on the opportunity to achieve returns in excess of inflation and accumulate enough money for college.

"History has proven that a diversified investment strategy — which is what the UNIQUE College Investing Plan Portfolios offer — provides the best opportunity to beat inflation in the long run. The combination of foreign and domestic equities, investment-grade and high-yield bonds, and short-term instruments allows participants to balance out investment risk over the long term, taking advantage of the performance swings in each asset class over time and increasing their chances of staying ahead of inflation."

33

## **Expected Asset and Benchmark Allocations**

During the coming months, we'll gradually reallocate each of the target investment mixes of the UNIQUE Plan's Actively-Managed Fund Portfolio's. The table below illustrates the target mix we'd like to achieve for each Age-Based and Static Portfolio on March 31, 2010.

Projected Target Mix: Actively Managed Fund Portfolios												
	College	2009	2012	2015	2018	2021	2024	2027	Conservative	70% Equity	100% Equity	
Domestic Equity Funds	20.0%	23.4%	30.3%	39.0%	50.0%	61.3%	70.3%	74.7%	_	60.0%	85.0%	
International Equity Funds	_	0.8%	3.1%	6.4%	8.9%	10.8%	12.4%	13.2%	_	10.0%	15.0%	
Inv. Grade Fixed-Income Funds	40.0%	40.4%	44.9%	41.4%	30.9%	20.2%	8.0%	0.5%	45.0%	20.0%	_	
High Yield Fixed-Income Funds	_	_	_	_	4.0%	6.6%	9.3%	11.6%	_	10.0%	_	
Short-Term Funds	40.0%	35.4%	21.7%	13.2%	6.2%	1.1%	_	_	55.0%	_	_	

Reflecting the changes to the target investment mixes described above, each Portfolio's composite benchmark will change its allocation, as necessary, from October 1, 2009 to March 31, 2010. The table below illustrates these changes.

Composite Benchmarks: Actively Managed Fund Portfolios												
	College	2009	2012	2015	2018	2021	2024	2027	Conservative	70% Equity	100% Equity

For the period December 27, 2004 (commencement of operations) to September 30, 2005.
Total returns for periods of less than one year are not annualized.
Calculated based on average units outstanding during the period.
The amount shown for a unit outstanding does not correspond with the aggregate net gain (loss) on investments for the period due to the timing of sales and repurchases of units in relation to fluctuating market values of investments of the Portfolio.

For the period November 6, 2006 (commencement of operations) to September 30, 2007.
Total returns for periods of less than one year are not annualized.
Calculated based on average units outstanding during the period.
The amount shown for a unit outstanding does not correspond with the aggregate net gain (loss) on investments for the period due to the timing of sales and repurchases of units in relation to fluctuating market values of investments of the Portfolio.

# UNIQUE Index Portfolio 2024 **Investment Summary**

Portfolio Holdings as of September 30, 2009			
	% of Portfolio's investments		
Domestic Equity Funds			
Spartan Total Market Index Fund Investor Class .	70.4		
International Equity Funds			
Spartan International Index Fund Investor Class .	12.5		
Investment Grade Fixed-Income Funds			
Spartan Intermediate Treasury Bond Index Fund			
Investor Class	<u> 17.1</u>		
	100.0		

The Portfolio invests according to an asset allocation strategy that becomes increasingly conservative over time. The current allocation is based on the Portfolio's holdings as of September 30, 2009. The expected allocation represents the Portfolio's anticipated target asset allocation at March 31, 2010.

Total returns for periods of less than one year are not annualized.
Calculated based on average units outstanding during the period.

#### **Notes to Financial Statements**

For the period ended September 30, 2009

#### 1. Organization

The New Hampshire Higher Education Savings Plan Trust (Trust) was formed to establish and maintain a qualified tuition program under section 529 of the Internal Revenue Code of 1986, as amended. The Treasurer of the State of New Hampshire (State of New Hampshire) is the Trustee of the Trust. These financials report on: UNIQUE College Portfolio, UNIQUE Portfolio 2009, UNIQUE Portfolio 2012, UNIQUE Portfolio 2015, UNIQUE Portfolio 2018, UNIQUE Portfolio 2021, UNIQUE Portfolio 2021, UNIQUE Portfolio, UNIQUE Index Portfolio, UNIQUE Index Portfolio, UNIQUE Index Portfolio 2019, UNIQUE Index Portfolio 2019, UNIQUE Index Portfolio 2015, UNIQUE Index Portfolio 2015, UNIQUE Index Portfolio 2018, UNIQUE Index Portfolio 2021, UNIQUE Index Portfolio 2024, UNIQUE Index Portfolio 2024, UNIQUE Index Portfolio 2027, UNIQUE Index Portfolio, UNIQUE Index Portfolio (Portfolios). The Portfolios invest primarily in a combination of other Fidelity equity, fixed-income, and short-term funds, collectively referred to as the Underlying Funds, managed by Fidelity Management & Research Company (FMR). There are individual Fund Portfolios which invest a single equity, fixed income, or money market fund, also managed by FMR.

#### 2. Significant Accounting Policies

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Events or transactions occurring after period end through the date that the financial statements were issued, December 14, 2009 have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the Portfolios:

**Security Valuation.** Investments in the Underlying Funds are valued at their closing net asset value each business day. Generally Accepted Accounting Principles (GAAP) establishes a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at measurement date. These inputs are classified into three levels. Level 1 includes readily available unadjusted quoted prices in active markets for identical assets or liabilities. Level 2 includes observable inputs other than quoted prices included in Level 1 that are observable either directly or indirectly. Level 3 includes unobservable inputs when market prices are not readily available or reliable. Changes in valuation techniques may result in transfers in or out of an investment's assigned level within the hierarchy. As of September 30, 2009, all investments held by the Portfolios are categorized as Level 1 under the Fair Value Hierarchy.

**Investment Transaction and Income.** For financial reporting purposes, the Portfolios' investment holdings and net asset value (NAV) include trades executed through the end of the last business day of the period. The NAV per unit for processing participant transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of average cost. Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date. There are no distributions of net investment gains or net investment income to the Portfolios' participant or beneficiaries.

**Expenses.** Expenses are recorded on the accrual basis. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with the Underlying Funds.

**Other.** The Portfolios have a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. There are no unrecognized tax benefits in the accompanying financial statements.

#### 3. Fees

The Trustee has entered into a Management and Administrative Services agreement with FMR LLC (the parent company of the group of companies commonly known as Fidelity Investments), Strategic Advisers, Inc. (Strategic) and Fidelity Brokerage Services, LLC (together Fidelity) to provide administrative, record keeping, marketing, and investment management services to the Trust. According to this agreement and a related investment advisory agreement with Strategic, an investment advisor registered under the Investment Advisers Act of 1940, Fidelity receives a Program Management fee computed daily at an annual rate based on the net assets of each Portfolio. For Portfolios that invest in underlying actively managed funds, this fee is currently charged at an annual rate of .15%. For Portfolios that invest in underlying index funds, this fee will be up to .35% and will vary based on the dollar-weighted blended expense ratio of the Portfolio's allocation of investments. The dollar-weighted blended expense ratio is a pro-rata allocation of expenses calculated for each Portfolio based on the current expense ratio of all the Underlying Funds, multiplied by the percentages held of each Underlying Fund in relation to the total investments of each Portfolio. Underlying fund expenses are not paid out of assets of each Portfolio and are not included in management and administration fees on the Statements of Operations, but rather are included in the daily NAV of each Underlying Funds. A Portfolio's allocation of expenses from Underlying Funds may be higher or lower depending on the actual expense ratios of the Underlying Funds, and those reductions

#### Notes to Financial Statements - continued

#### 3. Fees - continued

may be eliminated at any time. Please see the most recent prospectus or shareholder report of any Underlying Fund for more information about its current expenses. Although the allocated expenses from Underlying Funds may change, the Program Management Fee and the dollar-weighted blended expense ratio of Underlying Funds combined will not exceed .35%.

The Trustee receives a fee for its administrative services to the Trust. That fee is charged at an annual rate of .15% of the net assets of each Portfolio.

#### 4. Other Information

In the normal course of business, the Portfolios may enter into contracts that provide general indemnifications. The Portfolios' maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Portfolios. The risk of material loss from such claims is considered remote.

The Portfolios do not invest in the Underlying Funds for the purpose of exercising management or control; however, investments by the Portfolios within their principal investment strategies may represent a significant portion of the Underlying Fund's net assets. At the end of the period, no Portfolio held a significant portion of the outstanding shares of any Underlying Fund.

As of September 30, 2009, the Portfolios in aggregate owned more than 20% of the outstanding shares of the following Underlying Funds:

#### 5. Subsequent Event

Effective December 1, 2009, the Management and Administrative Fee charged to the Portfolios that invest in underlying actively managed funds was reduced from .30% to .20%. Additionally, the portion of the fee retained by Fidelity and the portion of the fee retained by the Trustee was changed. From December 1, 2009 through December 31, 2010 Fidelity will retain .08% and the Trustee will retain .12%. From January 1, 2011 through December 31, 2011, Fidelity will retain .09% and the Trustee will retain .11%. From January 1, 2012 through the end of the contract period (December 31, 2018), Fidelity will retain .10% and the Trustee will retain .10%.

For Portfolios that invest in underlying index funds, the Management and Administrative Fee was previously charged at an annual rate of .50%, which included an allocation of expenses from the Underlying Funds. Effective December 1, 2009, these Portfolios will be charged a Management and Administrative Fee of .15%, excluding expenses incurred through investments in the underlying index funds. Additionally, the portion of the fee retained by Fidelity and the portion of the fee retained by the Trustee was changed. From December 1, 2009 through December 31, 2010 Fidelity will retain .05% and the Trustee will retain .10%. From January 1, 2011 through December 31, 2011, Fidelity will retain .06% and the Trustee will retain .09%. From January 1, 2012 through the end of the contract period (December 31, 2018), Fidelity will retain .075% and the Trustee will retain .075%.

### **Report of Independent Auditors**

To the Fiscal Committee of the General Court of the State of New Hampshire, the Trustee of the New Hampshire Higher Education Savings Plan Trust and the Participants of The UNIQUE College Investing Plan:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of portfolio investments as of September 30, 2009, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the New Hampshire Higher Education Savings Plan Trust: UNIQUE College Portfolio, UNIQUE Portfolio 2009, UNIQUE Portfolio 2012, UNIQUE Portfolio 2015, UNIQUE Portfolio 2018, UNIQUE Portfolio 2021, UNIQUE Portfolio 2024, UNIQUE Portfolio 2027, UNIQUE Conservative Portfolio, UNIQUE 70% Equity Portfolio, UNIQUE 100% Equity Portfolio, UNIQUE Money Market Portfolio, UNIQUE Index College Portfolio, UNIQUE Index Portfolio 2009, UNIQUE Index Portfolio 2012, UNIQUE Index Portfolio 2015, UNIQUE Index Portfolio 2018, UNIQUE Index Portfolio 2021, UNIQUE Index Portfolio 2024. UNIQUE Index Portfolio 2027. UNIQUE Index Conservative Portfolio. UNIQUE Index 70% Equity Portfolio. UNIQUE Index 100% Equity Portfolio, UNIQUE Intermediate Treasury Index Portfolio, UNIQUE International Index Portfolio, UNIQUE Spartan 500 Index Portfolio and UNIQUE Total Market Index Portfolio (collectively the Portfolios) at September 30, 2009, and the results of each of their operations, the changes in each of their net assets and each of their financial highlights for the periods indicated, in conformity with accounting principles generally accepted in the United States of America. The financial statements and financial highlights (hereafter referred to as financial statements) are the responsibility of the Portfolios' management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which include confirmation of securities at September 30, 2009 by correspondence with the transfer agent, provide a reasonable basis for our opinion.
