# Trustee's Message to Participants

### Dear Participant:

On behalf of the State of New Hampshire and the College Tuition Savings Plan Advisory Commission (the "Commission"), I am pleased to provide you with your UNIQUE College Investing Plan (the "Plan") Annual Report for the one-year period from October 1, 2013, through September 30, 2014.

The Annual Report is designed to provide participants with an opportunity to review the Plan in depth, including the performance of the Portfolios, along with expense, holdings and asset allocation information. Additionally, the *Managers' Overview*, a discussion with Co-Portfolio Managers Andrew Dierdorf and Brett Sumsion, provides insight into Portfolio and market performance over the past year, as well as an outlook for the months ahead.

This past year, amid an increasingly less-certain global landscape, the U.S. maintained its economic progress. Low interest rates and solid corporate earnings growth helped the S&P 500® Index reach record levels, returning nearly 20% for the year ending September 30, 2014. Meanwhile, many non-U.S. equity indexes finished with gains in the 4–5% range, held back by geopolitical concerns and a strengthening U.S. dollar. Looking at fixed-income markets, bonds performed moderately well across a spectrum of security types.

The UNIQUE College Investing Plan offers a range of investment options including age-based, static, index and multi-firm portfolios. Fidelity Investments, the Plan's program manager, has made regular enhancements to the Plan offerings. This past year, Fidelity bolstered the Plan's lineup of underlying funds; and refined the strategic glide path — how asset allocation adjusts to better align expected return and risk along an investor's time horizon. In January 2014, Brett Sumsion joined the portfolio management team. Brett brings 13 years of asset-allocation experience to the Plan, and his appointment is expected to strengthen the team's broader investment capabilities. Brett replaced Christopher Sharpe on March 31, 2014, following a thoughtful and deliberate transition that provided continuity and consistency to the management of the Plan's asset-allocation strategies.

During these challenging times, we understand that our participants are concerned about how to save and pay for a college education, and we know that every dollar saved is important. You can take comfort in knowing that any growth of your investments will be tax deferred and withdrawals for qualified higher education expenses will be free from federal income tax. Lastly, we encourage you to call Fidelity's dedicated college planning representatives at 1-800-544-1914 to review your Plan account to help determine whether your investments are appropriately allocated based on your college savings goals.

Thank you for choosing the UNIQUE College Investing Plan. We look forward to serving your needs for years to come.

Sincerely,

William F. Dwyer Commissioner of the Treasury State of New Hampshire

### **UNIQUE College Portfolio (Fidelity Funds)**

# **Performance: The Bottom Line**

### **Performance**

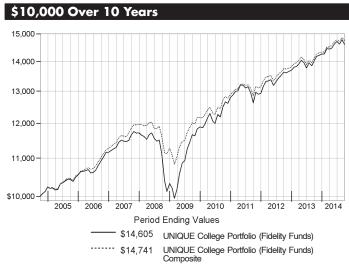

There are several ways to evaluate a Portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns			
Periods ended September 30, 2014	Past 1 year	Past 5 years	Past 10 years
UNIQUE College Portfolio (Fidelity Funds)	4.08%	25.23%	46.05%
UNIQUE College Portfolio (Fidelity Funds) Composite	4.37%	22.71%	47.41%
Barclays® U.S. Aggregate Bond Index	3.96%	22.37%	57.12%
Barclays® U.S. 3 Month Treasury Bellwether Index	0.06%	0.56%	17.57%
MSCI® ACWI® (All Country World Index) ex USA Index	4.90%	34.84%	100.74%
Dow Jones U.S. Total Stock Market Index <sup>sm</sup>	17.69%	108.62%	128.05%

Cumulative total returns show the Portfolio's performance in percentage terms over the periods shown. For example, if you invested \$1,000 in a Portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's return to the performance of the UNIQUE College Portfolio (Fidelity Funds) Composite, an approximate weighted combination of the following unmanaged indices: the Barclays® U.S. Aggregate Bond Index, the Barclays® U.S. 3 Month Treasury Bellwether Index, the MSCI® ACWI® (All Country World Index) ex USA Index, and the Dow Jones U.S. Total Stock Market IndexSM. These benchmarks include reinvested dividends and capital gains, if any. The index weightings may be adjusted periodically to reflect the Portfolio's changing asset allocation.

Average Annual Total Retur	ns

Dow Jones U.S. Total Stock Market Index	17.69%	15.84%	8.59%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Past 10 Years:** Let's say hypothetically that \$10,000 was invested in the UNIQUE College Portfolio (Fidelity Funds) on September 30, 2004 (past ten year period). The chart shows how the value of that investment would have changed, and also shows how the UNIQUE College Portfolio (Fidelity Funds) Composite performed over the same period.

# **Understanding Performance**

### **UNIQUE Portfolio 2033 (Fidelity Funds)**

# **Performance: The Bottom Line**

### **Performance**

There are several ways to evaluate a Portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns	
Period ended September 30, 2014	Life of Portfolio
UNIQUE Portfolio 2033 (Fidelity Funds)	6.20%
UNIQUE Portfolio 2033 (Fidelity Funds) Composite	7.47%
Barclays U.S. Aggregate Bond Index	3.84%
MSCI ACWI (All Country World Index) ex USA Index	3.49%
Dow Jones U.S. Total Stock Market Index	9.28%

Cumulative total returns show the Portfolio's performance in percentage terms over a set period of time — in this case since the UNIQUE Portfolio 2033 (Fidelity Funds) started on December 18, 2013. For example, if you invested \$1,000 in a Portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's return to the performance of the UNIQUE Portfolio 2033 (Fidelity Funds) Composite, an approximate weighted combination of the following unmanaged indices: the Barclays U.S. Aggregate Bond Index, the MSCI ACWI (All Country World Index) ex USA Index, and the Dow Jones U.S. Total Stock Market Index. These benchmarks include reinvested dividends and capital gains, if any. The index weightings may be adjusted periodically to reflect the Portfolio's changing asset allocation.

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year. These numbers will be reported once the Portfolio is a year old. In addition, the growth of a hypothetical \$10,000 investment in the Portfolio will appear.

# **Understanding Performance**

How a Portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a Portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

### **Performance: The Bottom Line**

### **Performance**

The information provided in the tables below shows you the performance of the Portfolio with comparisons over different time periods to the portfolio's relevant benchmark. Seeing the returns over different time periods can help you assess the portfolio's performance across multiple market environments. The performance information is presented in two ways — cumulative total returns and average annual total returns.

<b>Cumulative Total Returns</b>			
Periods ended September 30, 2014	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Money Market Portfolio*	0.00%	0.00%	8.60%
Barclays U.S. 3 Month Treasury Bellwether Index	0.06%	0.56%	9.13%

<sup>\*</sup> A portion of the Portfolio's expenses were reimbursed by Fidelity. Absent reimbursement, returns would have been lower.

**Cumulative total returns** show the Portfolio's performance in percentage terms over the periods shown. The Portfolio started on November 6, 2006. For example, if you invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's return to the performance of the Barclays U.S. 3 Month Treasury Bellwether Index. This benchmark includes reinvested dividends and capital gains, if any. The index returns are for the one-year and five-year periods ending September 30, 2014 and for the Life of Portfolio period from November 6, 2006 to September 30, 2014.

Average Annual Total Returns

The chart shows how the value of that investment would have changed, and also shows how the UNIQUE Portfolio 2024 (Fidelity Index) Composite performed over the same period.

# **Understanding Performance**

### **Performance**

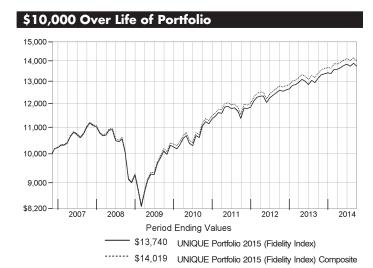

There are several ways to evaluate a Portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns			
Periods ended September 30, 2014	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Portfolio 2027 (Fidelity Index)	10.76%	72.03%	35.90%
UNIQUE Portfolio 2027 (Fidelity Index) Composite	11.10%	74.22%	40.42%
Bloomberg Commodity Index Total Return	-6.58%	-6.68%	-32.85%
Barclays U.S. Aggregate Bond Index	3.96%	22.37%	37.85%
MSCI EAFE Index	4.39%	38.25%	1.83%
Dow Jones U.S. Total Stock Market Index	17.69%	108.62%	59.51%

Cumulative total returns show the Portfolio's performance in percentage terms over the periods shown. For example, if you invested \$1,000 in a Portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's return to the performance of the UNIQUE Portfolio 2027 (Fidelity Index) Composite, an approximate weighted combination of the following unmanaged indices: the Bloomberg Commodity Index Total Return, the Barclays U.S. Aggregate Bond Index, the MSCI EAFE Index, and the Dow Jones U.S. Total Stock Market Index. These benchmarks include reinvested dividends and capital gains, if any. The index weightings may be adjusted periodically to reflect the Portfolio's changing asset allocation.

# **Understanding Performance**

How a Portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a Portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

## **Understanding Performance**

How a Portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a Portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Annual Report

### **Market Recap**

U.S. stocks overcame a slowing economy early in 2014 to post a solid gain for the 12 months ending September 30, 2014, supported at home by low interest rates, and globally by new stimulus efforts in Europe and China. The broad-market S&P 500® Index rose 19.73%, with growth stocks in the index beating value stocks. The tech-heavy Nasdaq Composite Index® rose 20.61%, whereas the small-cap Russell 2000® Index returned just 3.93%, due to valuation concerns, as well as the fear of eventually rising interest rates that could raise the cost of borrowing, especially for smaller, earlier-stage companies. Information technology (+29%) was the top sector in the S&P 500®, driven by strong results among semiconductor and hardware/equipment stocks. Health care (+28%) rose broadly, lifted by biotechnology and life sciences names. Materials (+20%) benefited from growth in housing construction, as well as a manufacturing revival fueled by low-cost North American shale oil. Conversely, energy stocks (+12%) lagged the index due to a sharp drop in crude oil prices since June, amid weak global demand and a U.S.-led surge in supply that threatened profits in the sector. Three traditionally defensive sectors — consumer staples, utilities and telecommunication services — each posted a double-digit return, but lagged the broad-market advance. Volatility was generally tame, with markets supported by declining unemployment, near-record corporate profits, muted inflation and low company debt levels. However, volatility spiked in July and again in September on depressed earnings outlooks in some sectors, as well as rising geopolitical tension, including the crisis in Ukraine, strained East-West relations and renewed conflict in the Middle East.

Meanwhile, U.S. taxable investment-grade bonds notched a gain for the 12-month period, driven by yield-advantaged sectors and easy monetary policy. The Barclays® U.S. Aggregate Bond Index rose 3.96% on the strength of longer-maturity bonds, which benefited the most from a decline in long-term interest rates. Among sectors in the Barclays index, high-grade credit was the biggest gainer, returning 6.64%, supported by solid corporate fundamentals and a low default rate. Lower-quality corporate issues received a strong bid in the market for much of the period, before a bout of profit-taking emerged on valuation concerns during the summer. Still, The BofA Merrill Lynch<sup>SM</sup> US High Yield Constrained Index rose 7.23% for the full year.

### Fund Talk: The Managers' Overview

**Note to shareholders:** The following is an interview with Andrew Dierdorf (left), Co-Portfolio Manager of the UNIQUE College Investing Plan<sup>SM</sup> Portfolios, and Brett Sumsion, who became a Co-Portfolio Manager on January 14, 2014.

## Q. Andrew, how did the Portfolios perform on an absolute basis for the 12 months ending September 30, 2014?

**A.D.** Across the spectrum of age-based and static Fidelity Funds, Multi-Firm and Fidelity Index Funds Portfolios, results were positive on an absolute basis for the one-year period. The longer-dated Portfolios, designed for participants who have the longest time horizon until matriculation, achieved the highest absolute returns. This is consistent with what we would anticipate, given that the longer-dated Portfolios have greater exposure to underlying equity funds, which generally performed well during the period. Accommodative monetary policy, low interest rates and minimal inflationary pressure globally provided a supportive backdrop for U.S. stocks. The Dow Jones U.S. Total Stock Market Index<sup>SM</sup> — a proxy for the Portfolios' exposure to the U.S. equity asset class — posted a gain of roughly 18%, Meanwhile, the MSCI ACWI (All Country World Index) ex USA Index, which represents the Portfolios' non-U.S. equity holdings, rose 5% for the period. After starting off 2014 on rough footing, stocks in non-U.S. developed and emerging markets rallied amid improved global financial conditions, lower global bond yields and stabilizing economic conditions, only to retreat late in the period in the face of a strengthening U.S. dollar and renewed economic concerns, including worries about deflation. Investment-grade bonds advanced 4%, reflecting mixed results among various segments: high-yield and real estate debt led the way, whereas inflation-protected debt lagged. Commodities delivered the worst return among the Portfolios' investable asset classes. (For specific results for Fidelity Funds Portfolios, Fidelity Index Funds Portfolios and Multi-Firm Portfolios, please refer to the performance section of this report.)

## **Q.** How did the age-based and static Fidelity Funds Portfolios perform relative to their respective Composite benchmarks?

**A.D.** The nearer-term, age-based Fidelity Funds Portfolios and the more-conservative static Portfolios performed roughly in line with their respective Composite indexes for the one-year period; the more aggressive, longer-term Portfolios modestly lagged. Most notably, the Portfolios' allocation to U.S. equities underperformed the asset-class benchmark. Smaller-cap and value-oriented investments such as Fidelity® Equity-Income Fund — the Portfolios' largest holding — and Fidelity® Stock Selector Small Cap Fund recorded below-benchmark returns. Conversely, larger-cap and more growth-oriented funds such as Fidelity Blue Chip Growth Fund outperformed. In the non-U.S. equity class, all Portfolio fund holdings outperformed the asset-class benchmark, Fidelity Emerging Markets Fund in particular. Also, the Portfolios' investment-grade bond

investments collectively outperformed the Barclays® U.S. Aggregate Bond Index. Here, Fidelity Investment Grade Bond Fund — a diversified, core fixed-income strategy and the Portfolios' largest holding — outperformed primarily on the strength of its picks among corporate bonds. Meanwhile, the allocation to commodities in the Portfolios' underlying index fund declined, returning -7% amid waning global demand, particularly from China. The Portfolios' investments in Treasury Inflation-Protected Securities (TIPS), also through an underlying index fund, also detracted from results as TIPS retreated in tandem with inflation concerns.

## **Q.** Brett, how did the Multi-Firm Portfolios perform on a relative basis during the same time frame?

**B.S.** Each of the Multi-Firm Portfolios lagged its respective Composite index, primarily due to underperformance in the U.S. equity class. While the Portfolios' largest allocation, JPMorgan U.S. Equity Fund, handily outpaced the asset-class benchmark, other large allocations such as Harbor Large Cap Value Fund — and all of the smaller-cap funds — lagged. In particular, ASTON/Montag & Caldwell Growth Fund did not meet our expectations and was eliminated from the lineup. The Portfolios' non-U.S. equity exposure also underperformed, as its largest allocation, MFS Research International Fund, gained only about 1% for the period, undermining stronger gains from other funds. Among the Portfolios' investment-grade bond holdings, Western Asset Core Bond Fund and Fidelity Investment Grade Bond Fund provided the biggest boost versus the Barclays U.S. Aggregate Bond Index.

#### Q. And the Fidelity Index Portfolios?

**B.S.** These Portfolios performed generally in line with their respective Composite benchmarks. These results are consistent with what we would expect for Portfolios that are designed to track indexes that correspond to each underlying investment component. The Index Portfolios have five investment components: U.S. equities, non-U.S. equities, investment-grade bonds, commodities and short-term debt instruments.

## **Q.** Andrew, would you please elaborate on how the Portfolios' fixed-income asset-class results influenced the Portfolios' absolute performance?

**A.D.** The Portfolios with the shortest time horizons — Fidelity Funds 2015 Portfolio, Multi-Firm 2015 Portfolio and Fidelity Index 2015 Portfolio — have the highest allocation to fixed-income investments, as these participants have shifted their focus from capital appreciation to capital preservation. Fixed-income instruments — namely U.S. investment-grade bonds — carry less risk than their equity counterparts, which is especially important for participants closer to matriculation. So, while the shorter-dated Portfolios experienced smaller absolute returns for the period, these Portfolios also had a more conservative asset allocation, with less risk compared with our longer-dated Portfolios. This asset allocation is in alignment with what we refer to as the "glide path" — our strategy for determining and gradually adjusting the appropriate risk/return balance as each Portfolio approaches its target date. Our goal, of course, is for each Portfolio to meet its ultimate objective of providing participants with a valuable means of saving for college.

#### Q. Brett, what is your outlook as of period end?

**B.S.** We believe that the U.S. economy is in the middle part of the economic cycle and any growth is likely to be muted. The recent slowdown in growth has increased market volatility, and less economically sensitive assets fared best during this period. The Fed's bond-buying program is likely to conclude, but interest rates will likely remain at absolute low

levels for an extended time. Regardless of economic and market conditions, we will continue to evaluate our investment process and make enhancements in the best interest of participants, balancing risk and return in the context of overall objectives. Over the long term, the investment approach offered by UNIQUE College Investing Plan Portfolios — one that employs multiple asset classes — can help smooth short-term performance swings resulting from market volatility. We believe our diversified investment strategy can provide participants with an effective approach to college saving.

### **Portfolio Facts**

Goals: Each age-based Portfolio (Fidelity Funds. Fidelity Index and Multi-Firm) seeks capital appreciation with reasonable safety of principal, consistent with the ages of the beneficiaries for whom it is designed. There are six static allocation Portfolios. The investment objective of Conservative Portfolio (Fidelity Funds) and Conservative Portfolio (Fidelity Index) is preservation of capital by allocating their assets among bond and money market funds; income is a secondary objective. The investment objective of Moderate Growth Portfolio (Fidelity Funds) and Moderate Growth Portfolio (Fidelity Index) is to maximize total return over the long term by allocating assets among stock and bond mutual funds. The investment objective of Aggressive Growth Portfolio (Fidelity Funds) and Aggressive Growth Portfolio (Fidelity Index) is growth of capital over the long term. Bank Deposit Portfolio seeks preservation of capital. Each individual fund Portfolio has the same investment objective as the underlying mutual fund in which it invests.

Start dates: Fidelity Funds Portfolios (age-based, static and individual) started on July 1, 1998, except Portfolio 2018, which started January 4, 1999; Moderate Growth Portfolio, May 10, 2001; Aggressive Growth Portfolio, May 7, 2001; Portfolio 2021 and Conservative Portfolio, which both started December 13, 2001; Portfolio 2024, December 27, 2004; Money Market Portfolio, November 6, 2006; Portfolio 2027, December 14, 2007; Portfolio 2030, December 28, 2010; and Portfolio 2033, which started on December 18, 2013.

Fidelity Index Portfolios (age-based, static and individual) started November 6, 2006, except Index 2027, which started December 14, 2007; Index 2030, December 28, 2010; and Index 2033, December 18, 2013.

Bank Deposit Portfolio started on September 16, 2010. Multi-Firm Portfolios started September 28, 2011, save Multi-Firm 2033, which started December 18, 2013.

## Andrew Dierdorf on recent changes to the UNIQUE College Investing Plan Portfolios:

"Fidelity has made several important changes to the UNIQUE College Investing Plan Portfolios during this past year.

"As noted, ASTON/Montag & Caldwell Growth Fund was removed from our lineup of investements in the age-based Multi-Firm Portfolios, as was Royce Pennsylvania Mutual Fund. These were replaced by BBH Core Select Fund and Champlain Small Company Fund, which better met our needs and expectations. Similarly, we replaced Natixis AEW Real Esate Fund with Fidelity Real Estate Investment Fund. Also, we added Fidelity New Markets Income Fund, which focuses primarily on emerging-markets bonds with the goal of generating high current income.

"On January 1, 2014, the non-U.S. equity component of the actively managed Portfolios' Composite indexes changed from the MSCI EAFE Index to the MSCI ACWI (All Country World Index) ex USA Index, which extends exposure to emerging markets.

"Effective April 1, 2014, Fidelity implemented active allocation flexibility across the actively managed, age-based Fidelity Funds and Multi-Firm Portfolios in the UNIQUE College Investing Plan Portfolios. The change does not affect the Fidelity Index Funds age-based Portfolios. This active allocation approach allows Portfolio asset-class allocations to vary from strategic benchmark allocations by up to plus or minus 10 percentage points. Active allocation decisions reflect the investment team's asset-class outlooks, generally focusing on a one- to five-year time horizon. We believe this approach could provide a complementary source of incremental added value to the 529 Portfolios and improve outcomes for investors. [Note: There is no guarantee that any value will be added and the strategy may result in losses to the Portfolios.]

"In addition, the Composite benchmark for the actively managed age-based and static Portfolios transitioned to four components — U.S. equities, non-U.S. equities, bonds and short-term debt, as represented respectively by the Dow Jones U.S. Total Stock Market Index<sup>SM</sup>, MSCI ACWI ex USA Index, Barclays® U.S. Aggregate Bond Index and Barclays® U.S. 3 Month Treasury Bellwether Index. This provides a simplified benchmark structure that aligns with the Portfolios' strategic glide path allocations. Also, the Portfolios maintain the investment flexibility to include additional asset classes at the discretion of the investment management team.

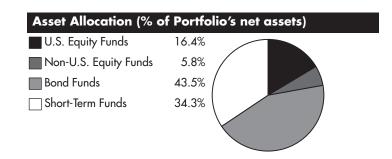

"Lastly, in January 2014, we welcomed Brett Sumsion to the team as a Co-Manager of the Funds. Brett brings 13 years of asset-allocation experience to our target-date offerings, and his appointment strengthens the team's broader investment capabilities. Brett replaced Chris Sharpe on March 31, 2014, following a thoughtful and deliberate transition period that, along with my nearly 10 years on the asset-allocation team, ensured continuity and consistency to the management of the Portfolios' asset-allocation strategies.

"Fidelity is committed to delivering excellence in its target-date strategies. We believe these changes offer the investment management team greater flexibility to deliver incremental value to the 529 Portfolios and improve outcomes for participants."

#### 2. Significant Accounting Policies:

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Events or transactions occurring after period end through the date that the financial statements were issued, January 14, 2015 have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the Portfolios:

**Investment Valuation.** Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. Each Portfolio categorizes the inputs to valuation techniques used to value their investments into a disclosure hierarchy consisting of three levels as shown below:

177

Level 1 – quoted prices in active markets for identical investments

Level 2 – other significant observable inputs

Level 3 – unobservable inputs (including each Portfolio's own assumptions based on the best information available)

#### Notes to Financial Statements - continued

#### 2. Significant Accounting Policies - continued

#### Investment Valuation - continued

Valuation techniques used to value each Portfolio's investments by major category are as follows:

Investments in the Underlying Funds are valued at their closing net asset value (NAV) each business day and are categorized as Level 1 in the hierarchy. If a Third Party Fund's NAV is unavailable, shares of that fund may be valued by another method that the Board of Trustees (Board) believes reflects fair value in accordance with the Board's fair value pricing policies and is categorized as Level 2 in the hierarchy. As of September 30, 2014, all investments held by the Portfolios are categorized as Level 1 under the Fair Value Hierarchy.

**Investment Transactions and Income.** For financial reporting purposes, the Portfolios' investment holdings and NAV include trades executed through the end of the last business day of the period. The NAV per unit for processing participant transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of average cost. Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date. Interest income is accrued as earned. There are no distributions of net investment gains or net investment income to the Portfolios' participants or beneficiaries.

**Expenses.** Expenses are recorded on the accrual basis. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with the Underlying Funds.

**Short-Term Trading (Redemption) Fees.** Units held in UNIQUE International Index Portfolio and UNIQUE Total Market Index Portfolio less than 90 days are subject to a redemption fee equal to 1.00% and 0.50%, respectively, of the proceeds of the redeemed units. The fee is imposed by the mutual fund in which the Portfolio invests, not by the Portfolio. All redemption fees are retained by the Underlying Fund, not by the Portfolio and are part of the Underlying Fund's assets.

**Other.** There are no unrecognized tax benefits in the accompanying financial statements in connection with the tax positions taken by each Portfolio. The Portfolios do not file any tax returns since the Trust is exempt from federal and state income tax under Section 529 of the Internal Revenue Code.

#### 3. Fees:

The Trustee has entered into a Management and Administrative Services agreement with FMR LLC (the parent company of the group of companies commonly known as Fidelity Investments), Strategic Advisers, Inc. (Strategic), and Fidelity Brokerage Services, LLC (together Fidelity) to provide administrative, record keeping, distribution, marketing and investment management services to the Trust. According to this agreement and a related investment advisory agreement with Strategic, an investment adviser registered under the Investment Advisers Act of 1940, a Management and Administration Fee is charged to the Portfolios at an annual rate based on the net assets of each Portfolio. The Management and Administration Fee has up to three components, a Program Management Fee that is paid to Fidelity, a Bank Administration Fee that is also paid to Fidelity, and a State Fee that is paid to the Trustee.

For Fidelity Funds Portfolios that invest in underlying actively managed funds, the Program Management Fee is charged at an annual rate of .10%. For Fidelity Index Portfolios that invest in underlying index funds, the Program Management Fee is charged at an annual rate .04%. For Multi-Firm Portfolios that invest in Fidelity funds and Third Party Funds, the Program Management Fee is charged at an annual rate of .25%. For the UNIQUE Bank Deposit Portfolio, the Program Management Fee is charged at an annual rate ranging from .00% to .05% depending on the daily Federal Funds Target Rate.

The Bank Administration Fee paid to Fidelity for its administration services in connection with the UNIQUE Bank Deposit Portfolio is charged at an annual rate ranging from .00% to .40% depending on the daily Federal Funds Target Rate. The Bank Administration Fee is charged only to the UNIQUE Bank Deposit Portfolio.

For Fidelity Funds Portfolios that invest in underlying actively managed funds, the State Fee is charged at an annual rate of .10%. For Fidelity Index Portfolios that invest in underlying index funds, the State Fee is charged at an annual rate of .05%. For Multi-Firm Portfolios that invest in Fidelity funds and Third party funds, the State fee is charged at an annual rate of .10%. For the Bank Deposit Portfolio, the State Fee is charged at an annual rate of .05%.

For the period ended September 30, 2014 FMR LLC voluntarily agreed to waive certain expenses of the UNIQUE Money Market Portfolio. Waivers are shown on the Portfolio's Statement of Operations under the caption "Expense reductions."

UNIQUE Money Market Portfolio \$ 256,045

#### 4. Other Information:

In the normal course of business, the Portfolios may enter into contracts that provide general indemnifications. The Portfolios' maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Portfolios. The risk of material loss from such claims is considered remote.

The Portfolios do not invest in the Underlying Funds for the purpose of exercising management or control; however, investments by the Portfolios within their principal investment strategies may represent a significant portion of an Underlying Fund's net assets. At the end of the period, no portfolios held a significant portion of the outstanding shares of any Underlying Fund.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

UNIQUE Portfolio 2033 (Multi-Firm)

#### Auditor's Responsibility

UNIQUE Portfolio 2027 (Fidelity Index)

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position at September 30, 2014, and the results of their operations, changes in their net assets, and the financial highlights for the periods indicated, in accordance with accounting principles generally accepted in the United States of America.
